The new Bay-blend® plastics, are even more resistant and elastic

Large buttons protected against accidental operation

Radio-controls with 4.5 million billion combinations.
433.92 MHz rolling code system with self-learning function.

Flor is the ideal solution for the management of multi-use systems with a unique and personal code: the self-learning receivers are able to receive and store up to 1020 codes.

Rolling code transmission: **absolutely secure** because it's impossible to clone the transmitter.

Self-learning function: the codes can be entered at a distance with an authorised transmitter or with a programming button on the receiver while a Led displays the different functions.

A drop in consumption but greater independence. Low battery warning via Leds.

The Flor-s system includes:

Transmitters with 2 and 4 channels.

Universal **receiver** with 2 channels, universal modular, plug-in or for universal outdoors IP53, with step-by-step, timer and anti-burglar functions.

The **aerial** can be incorporated in the Lucy flashing light or in the outdoor IP53 receiver, or fixed with a bracket.

FLO2R-S	FLO4R-S

Code	Description
FLO2R-S	2 channels
FLO4R-S	4 channels

Bimodal radio control unit with incorporated transponder, 4.5 million billion combinations.
433.92 MHz rolling-code system with recognition and sequential code for multiple insertion.

The innovative Flor-m transmitters transponders offer new options for controlling entries, by uniting several commands in a single product. Available in the 2 and 4 channel versions, the features of these models are identical to those of the Flor-sc transmitters and **programmable and reprogrammable Mocardp: a Nice exclusive.**

The BUPC software makes it possible to memorise entire 100 piece packs in one operation, without even having to open them!
Flor-m can be connected to MOU palm-top for an easy management of the on-site codes or via PC;
Flor-m is recognised by both FloR receivers and MyMoon transponder readers.

The new Bay-blend® plastics, are even more resistant and elastic

Large buttons protected against accidental operation

Incorporated transponder

FLO2R-M	FLO4R-M

Code	Description
FLO2R-M	2 channels sequential code for multiple insertion and incorporated transponder technology
FLO4R-M	4 channels sequential code for multiple insertion and incorporated transponder technology

Technical specifications

Carrier frequency	433.92 MHz ±100 KHz
Estimated range	150 - 200 m with a tuned aerial in a free area
Coding	digital 52 bit (4.5 million billion combinations)
Power supply	12 Vdc + 20% - 40% with 23 A battery
Average absorption (mA)	25
Dimensions (mm)	72x40x15 h

Technical specifications

Carrier frequency	433.92 MHz ±100 KHz
Estimated range	150 - 200 m with a tuned aerial in a free area
Anti-crushing distance (cm)	3 ÷ 5
Coding	52 bit digital (4.5 milion billion combinations)
Power supply	12 Vdc + 20% - 40% with 23 A battery
Average absorption (mA)	25
Dimensions (mm)	72x40x15 h
